Text2.Text = Val((Text1.Text) - 32) / 1.8  
End Sub
```

5. Programa de HOLA

The image shows a Visual Basic form titled "Form1". It contains three text boxes and three buttons. The first text box is labeled "NOMBRE" and has a button labeled "SALUDO" to its right. Below this is a second text box. To the right of the second text box is a button labeled "MENSAJE". Below the second text box is a third text box. To the right of the third text box is a button labeled "SALIR". The form has a standard Windows window border with minimize, maximize, and close buttons in the top right corner.

```
Private Sub Command1_Click()
```

```
Nom = Text1.Text
```

```
Text2.Text = "Hola " & Nom & ", Bienvenido a Visual Basic"
```

```
End Sub
```

```
Private Sub Command2_Click()
```

```
Text3.Text = "Visual Basic es bastante sencillo y tu lo aprenderás rápidamente"
```

```
End Sub
```

```
Private Sub Command3_Click()
```

```
End
```

```
End Sub
```
